

COMPANY PROFILE

Version 06.2023

Assembly Technology for Smart Devices

XENON is a leading German manufacturer of assembly and inspection lines for the automated production of mechatronic components. As an independent system integrator, XENON supplies turnkey high-tech production lines worldwide.

For more than 30 years, the owner-managed group headquartered in Dresden, Germany, with plants in China and Mexico, has been offering tailor-made automation solutions from project application to manufacturing and installation up to after-sales service.

Industries

Product Groups

Automotive & Electronics

- Actuators, Sensors
- Electrical Systems
- Power Electronics
